

## **Use Apple Pencil**

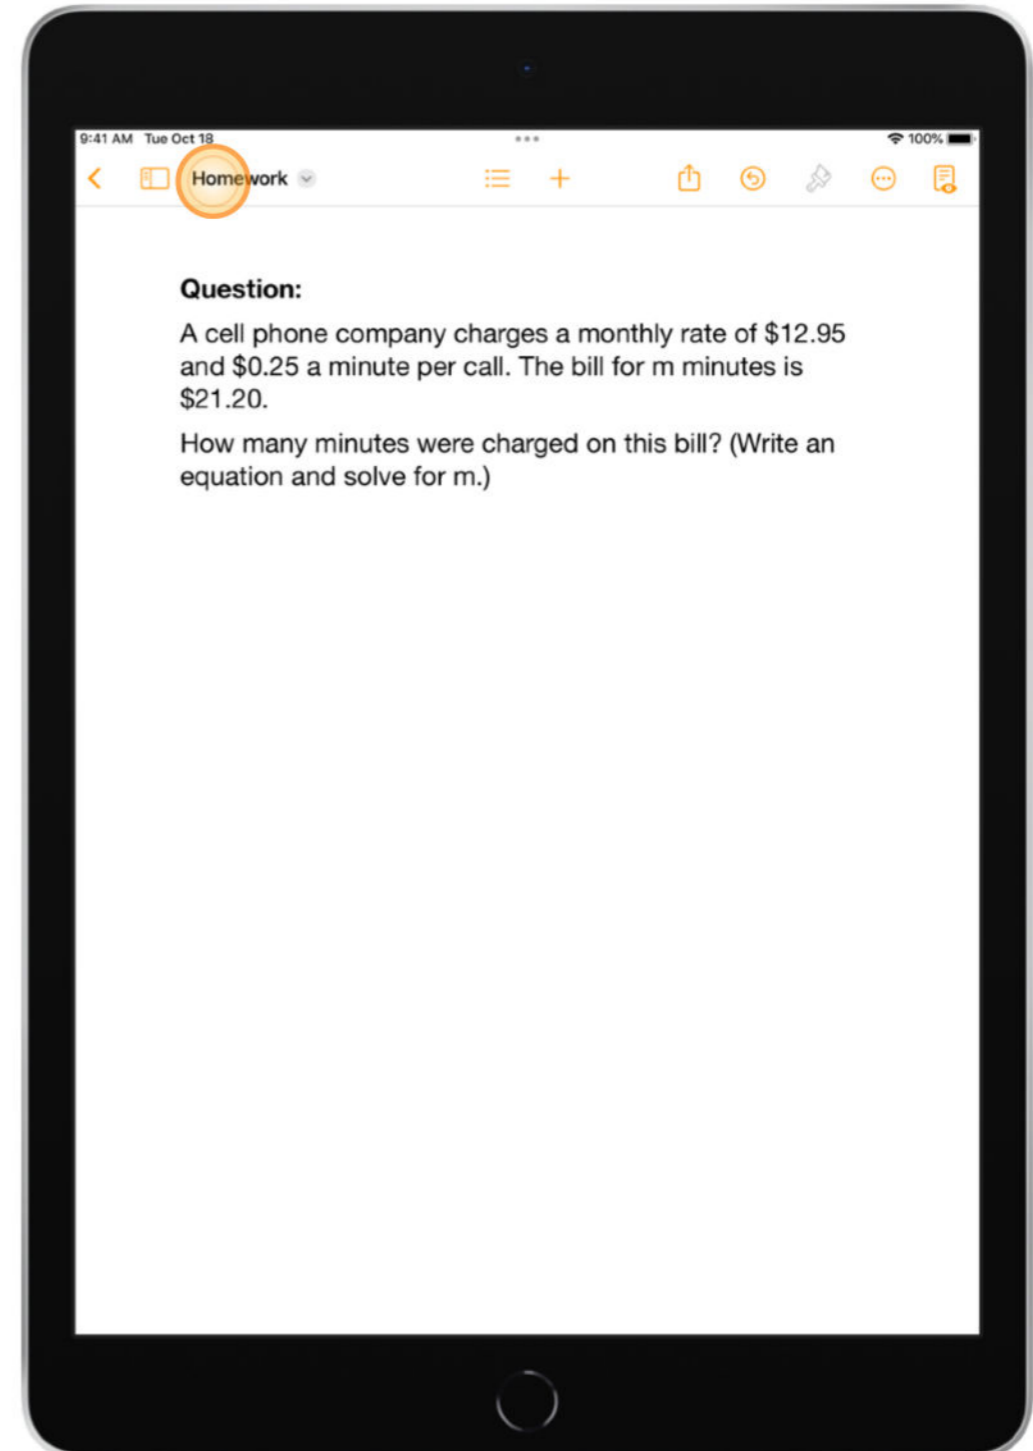

To Solve an Equation in Pages

## Use Apple Pencil To Solve an Equation in Pages

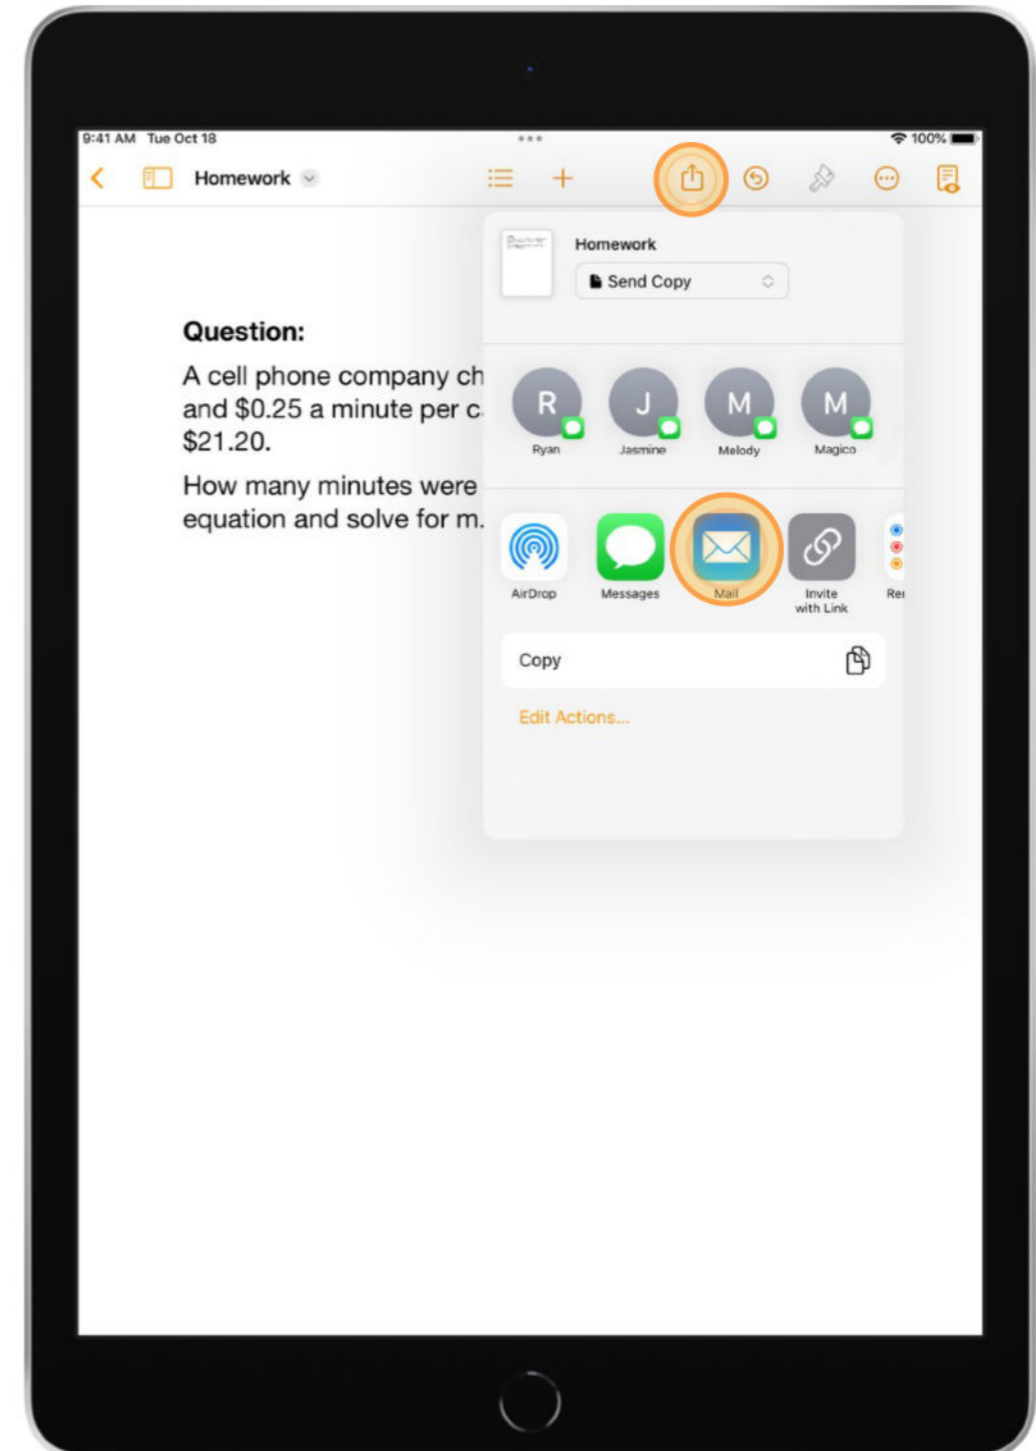

- 1 Open Pages on iPad and create a new document.  
You can rename the document to something such as "Homework" by selecting the title at the top of the page.
- 2 Write the question (or questions) you want students to solve. You can use the keyboard to type the questions or use the Scribble feature to handwrite the questions and have them automatically converted to text.

**TIP:** To use the Scribble feature, tap anywhere on the screen with Apple Pencil and select the Scribble tool from the toolbar.

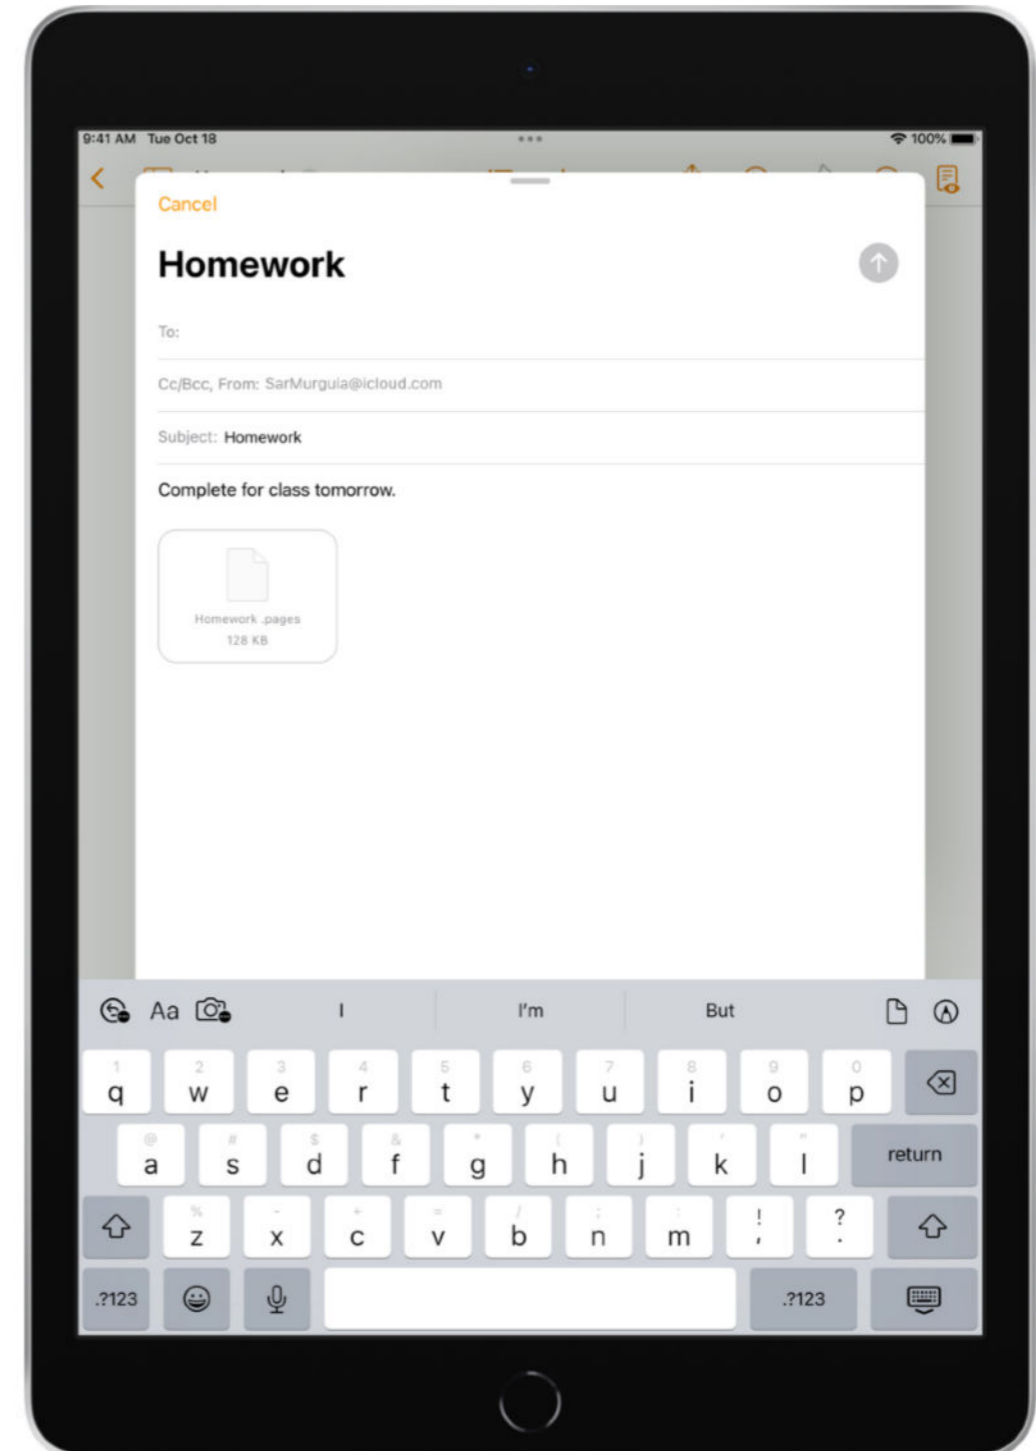

## Use Apple Pencil To Solve an Equation in Pages

- 3 Tap Share  at the top of the screen.
- 4 After you select Share, you can choose to send the file using AirDrop, Messages, Mail and other apps.

## Use Apple Pencil To Solve an Equation in Pages

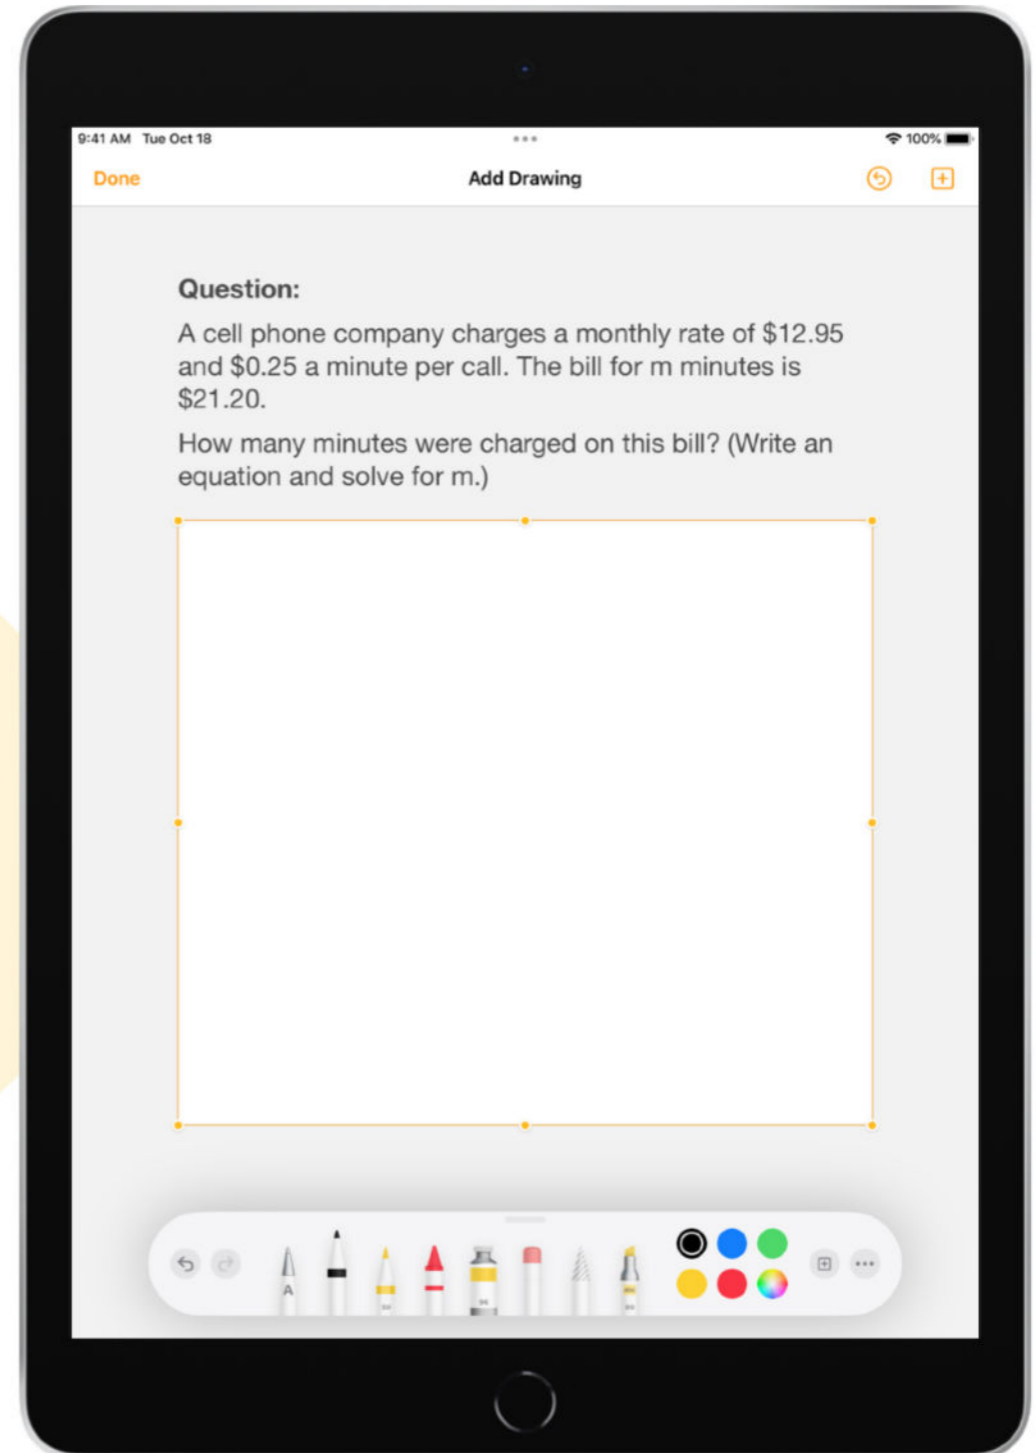

- 5 Choose the app that you prefer to use when sending assignments to students.

## Use Apple Pencil To Solve an Equation in Pages

- 6 Students can open the file directly in Pages. They can tap anywhere on the screen with Apple Pencil to insert a handwriting space, and they can adjust the size of the space if they need more space.

**TIP:** Use the Pen tool from the toolbar and adjust it to the desired thickness by touching and holding the Pen tool with Apple Pencil.

## Use Apple Pencil To Solve an Equation in Pages

7 Students can solve the problem by hand using methods learned during lessons.

Encourage students to use different colours to show different functions or steps in the process.

8 By tapping Share  at the top of the screen, students can send the solution back to the teacher.

The teacher can use Apple Pencil to mark, add notes or make corrections on the same document and send it back to the student.

**TIP:** Remind students that they can use the Eraser tool if they make a mistake.
